Preface

The present series **Marching Ahead** has been composed by keeping in mind the essentiality of the knowledge of science in the modern era, and is based on the latest syllabus and guidelines issued by the **National Council of Educational Research and Training (NCERT)**.

In these books, the process of learning science is made more effective and enjoyable.

Salient features of the series...

Use of simple and lucid language according to the mental status of the students.

A number of precise illustrations and tables have been included for explaining the contents of the chapter.

- ❖ Information regarding the various headings of each chapter under **Contents of the Chapter**.
- ❖ Simple experiments related with the chapter are outlined under the heading **Activity**.
- ❖ Added information has been provided under **Interesting Facts**.
- ❖ The summaries at the end of each chapter are meant as aid to memory under the heading **Highlights**.
- ❖ The **Exercise** given in each chapter is comprehensive, thorough and of every possible kind.
- ❖ **Project Work** for the students at the end of each chapter.
- ❖ Two **Model Test Papers** to test the comprehension of principles and processes adequately.

With valuable support and encouraging inputs, we hope that these books will help the young learners develop an abiding interest in the environmental phenomena.

We look forward to any other suggestions or criticisms aimed at further improvement of the books in this series.
